

Caduceus 1982

The second of th

Four Years Ago, We Arrived At Last At Our Starting Place, Medical School. Since That Time, We Have Learned A Vast Amount

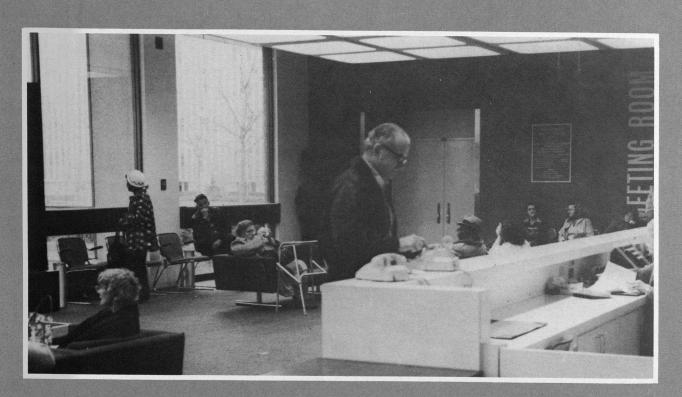

About Life's Ectasy

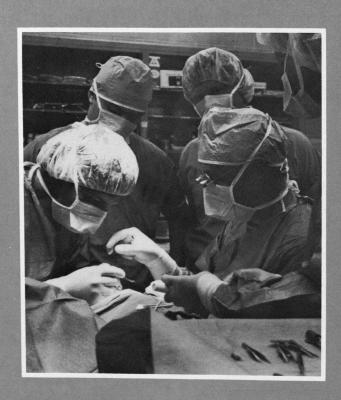

And Its Disillusionment

About Our Strengths

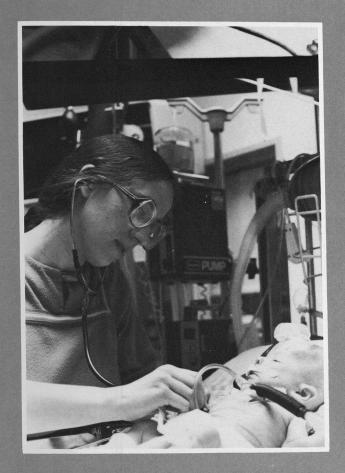

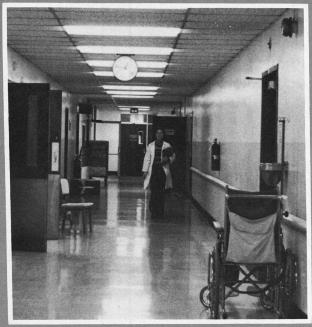

And Our Inadequacies

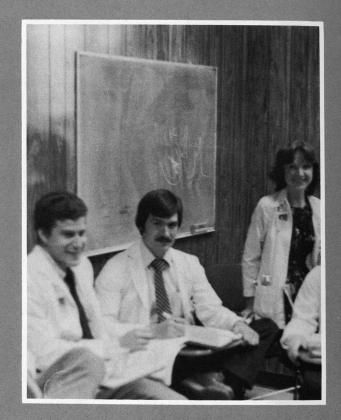

About Where We Count And Where Our Place Is

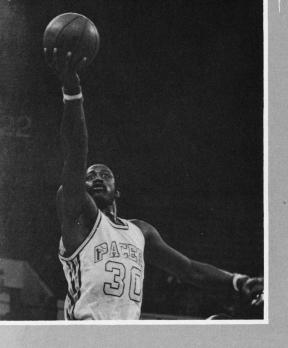

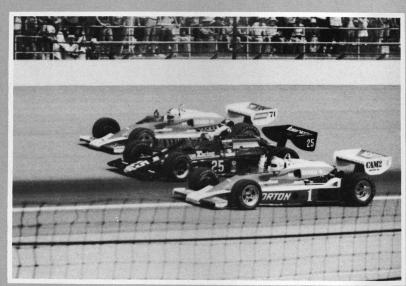

Despite Our Differences, The One Experience We Have All Shared Is Each Other — For In The End, It Is Our Friends Who Have Picked Us Up And Carried Us Through To The Other Side.

MED SCI

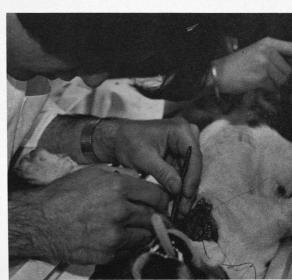

It's kinda funny, you know, but after four years you get to thinking of places around here as your friends. Well, not friends, exactly, but companions which remind you of what these years have been.

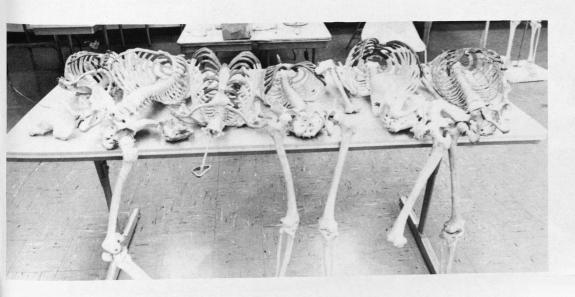

Good old Med Sci. for instance, housing the memories of the basic science years that you'd just as soon forget. All those hours spent in drowsy lecture halls or spent studying, pretending to study, or worrying about not studying. All those crazy "disco dissection" and dog lab days. And all the spare-change kind of time when you had a quick diet Pepsi, Cheetos, and a chat with a friend.

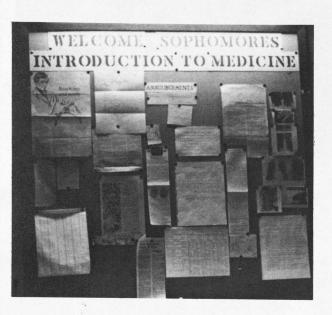

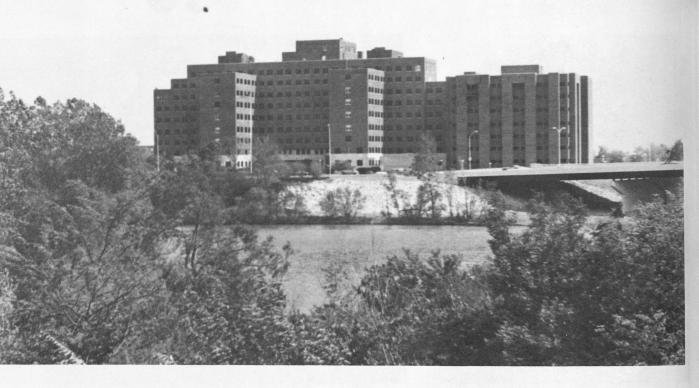

THE WHITE CASTLE

How many zebras did you see at University Hospital? You learned rapidly that, as The Mecca, University attracted patients with Strange Diseases or patients with R/O Strange Diseases and strange staff men interested in diseases.

You saw what it meant to be sick when you're rich, up on the "Krannert" with its velveteen chairs, crystal glasses, and engraved menus. But then you also learned that D5 is D5 even when it's hanging from gold IV poles, and Vfib is Vfib no matter how much insurance you have.

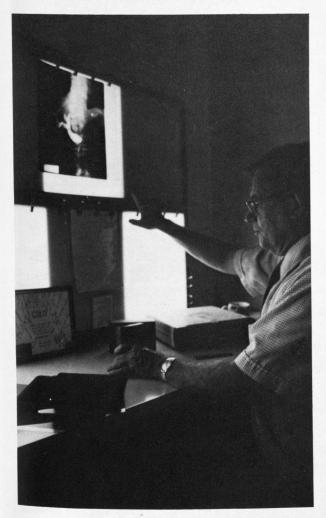

THE VAH SPA

Ah, the Spa, home of the friendly neighborhood vet come in out of the cold.

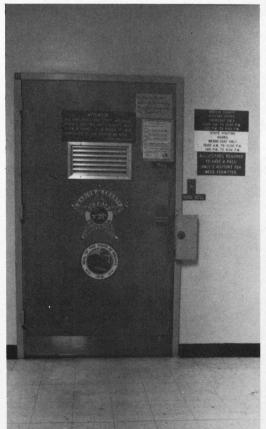

What you learned at the V.A.:

- how to draw blood from a turnip (muttering "V.A., may we hurt you?" under your breath)
- 2. what socialized medicine would be like
- 3. how to extract a value from the lab without hearing "Sorry, we never got the specimen"
- 4. what it means to be down and out 5. and "Ca on the PA at the V.A." (If tumor's the rumor

They hired the government's best prison architect; bought some art, foam slippers and brown bathrobes; made it a week's wait for an upper GI; and then discounted the cigarettes in the commissary — anything to keep the customers satisfied ...

THE WIZ

Can you ever make anyone understand the wild and wacky world of Wishard?

After you got there, you swore off drinking (for awhile), put on a PPD, and started advocating gun control. Remember the 20-year-old G5P4 in OB clinic who said, "Look at all the young girls here these days!"? Remember the one good 9:30 meal you had? Remember the story about the nurse who coded on an illicit rendezvous in Sunshine Hall? Remember the heroin addict who showed you where his best veins were?

THE RILEY

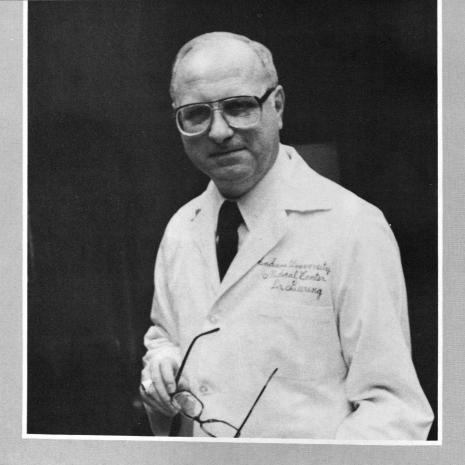

Of all of the places in the world, Riley will either make you believe in God or make you believe there is no God.

Riley teaches you what heroism is, and courage, because those kids have it. They have it more and better than you would have had it if you were their age, or at least you feel that way. At Riley, though, you also get a glance at the void, because sickness or death for a kid doesn't seem to have any possible meaning and it makes you question sometimes.

And Riley, more than anything, makes you work hard at being a healer because you know you're not just saving a life, you're saving a life's worth of potential.

Dear Colleagues:

Congratulations on receiving your M.D.! You have now completed the formal part of your medical studies and are ready to begin your specialty training. During your college years you developed as a person. You acquired values, a philosophy of life, a sense of self, a concern for community, empathy for your fellow man and a knowledge of history. You dreamt big dreams. You channeled your curiosity into thousands of questions and disciplined yourself into reflective thought. You dared to try new things. You learned what is right, what is reasonable and what is realistic. You even gained an appreciation of your own limitations. You wanted to make a difference and a very special contribution.

During the past four years, you have learned much factual knowledge and acquired many important skills. Perhaps the most important thing you learned was to communicate with sick people. You did a lot of reading, thinking, speaking, writing and, most importantly, listening. You have experienced the art and the science of medicine. You have lived with fatigue. You have been uplifted when your efforts have provided comfort and brought hope.

You are well prepared for the challenges ahead. I wish you the very best of success in your career.

Sincerely yours,

Steven C. Beering, M.D.

South Bend

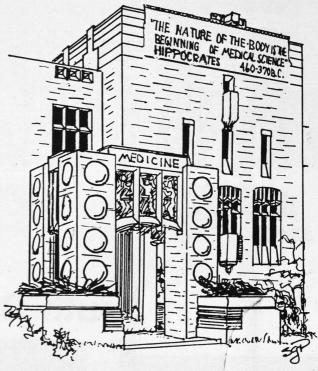

Bloomington

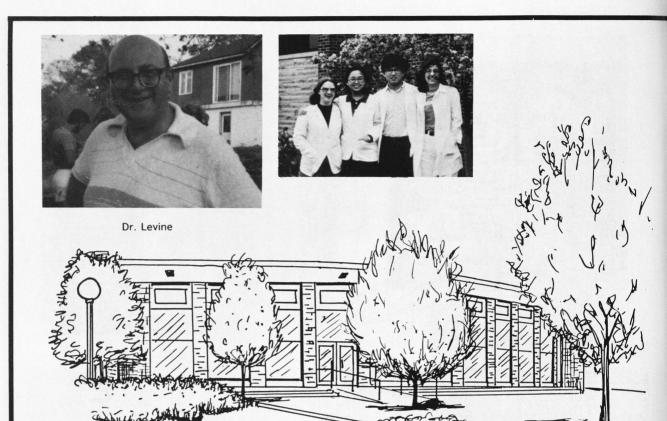

Terre Haute

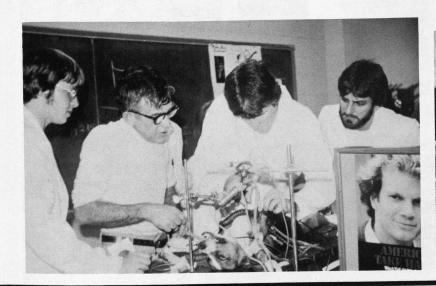

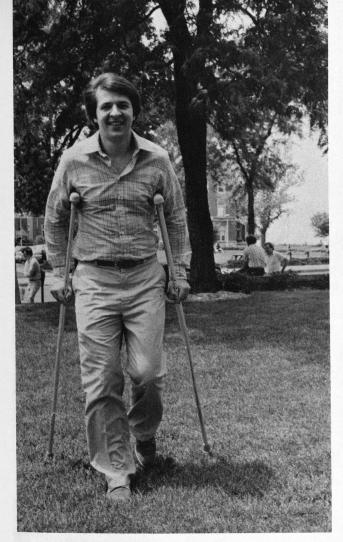

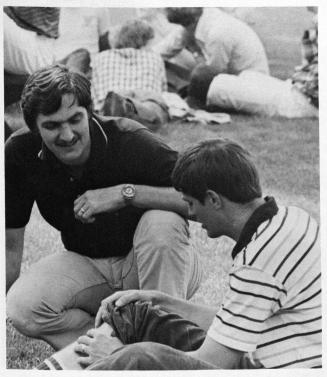

'n' so yer graduatin'
'n' it reminds ya a hi scl but
this time, there isn't any scl song ta sing or colors ta wear
cuz this is the graduation inta the Real World as they call it,
makin' money, holdin' down a job, which in yer case is a career or a profession, I guess,
out in a way ya got yer own kinda scl spirit
which yu'll remember
which is everybuddy pullin' tagether ta get thru
cuz suddenly whatcher doin' is tuffer'n what yu've done before
'n' yer workin' harder
'n' feelin' stupider
'n' gettin' fewer rewards
then yu've ever before

'n' ya remember back in freshman year when ya wished yu'd gone inta history or English lit like ya always wanted to 'n' ya remember talkin' to yer buddy who wished he was on a farm 'n' the other guy who wished he was writin' poetry or flyin' airplanes.

'n' the other guy who wished he was writin' poetry or flyin' airplanes er the gal who wanted to design houses or dance in hometown musicals 'n' ya think of the friends yu've lost cuz they hate doctors 'n' yer a doctor er cuz they think yer uppity er cuz yu can't relate anymore

'n' ya remember the long hours
'n' the good books ya didn't read
'n' the movies ya didn't see
'n' the ball games ya didn't play in
'n' the people ya didn't meet
'n' the concerts ya didn't go to
'n' the kids ya didn't have
'n' the money ya didn't make
'n' ya wonder if ya stayed in
jus becuz ya didn't have
the guts ta get out

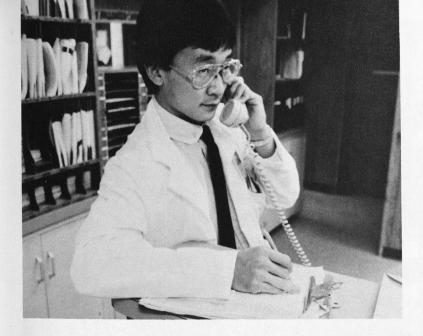

'n' then

ya start ta think abt it

'n' ya start ta think abt bein' down in the Wishard ER 'n' helpin' put in yer first chest tube

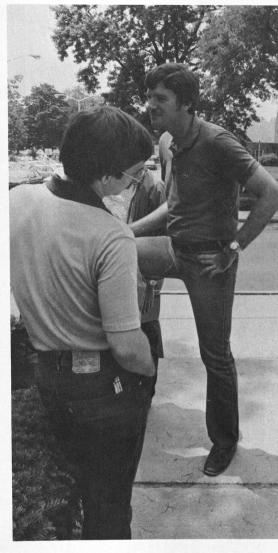

'n' ya remember deliverin' yer first kid
'n' eatin breakfast with yer buddies on medicine
'n' bitchin' over the 9:30 mystery meal at the Wiz
'n' how yer buddies stuck up for ya against yer strafer

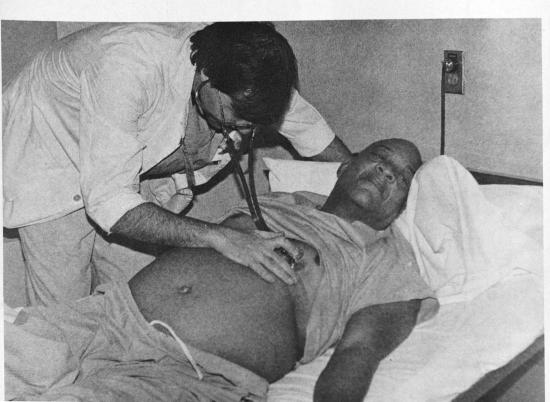

'n' how they helped ya pass micro and neuro when yu were so scared ya couldn't sleep

'n' ya remember one night when yer on call 'n' it's the middle of the night 'n' the middle of a code

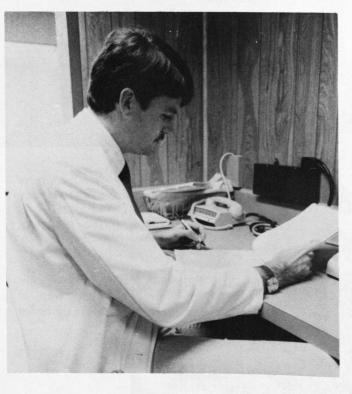

'n' the middle of a code
'n' yer pumpin' or baggin' for the first time
'n' everybuddy's workin' together
'n' yu ferget yer sleepy
'n' yu ferget yer gonna get pimped over in the am
by yer staffman
'n' yu ferget abt medicine meanin' readin' journals 'n' books
cuz here ya are tryin' ta save a life
'n' ya think, all i'm doin' is pumpin' or baggin'
'n' then ya realize if ya quit what yer doin'
then the guy'd die

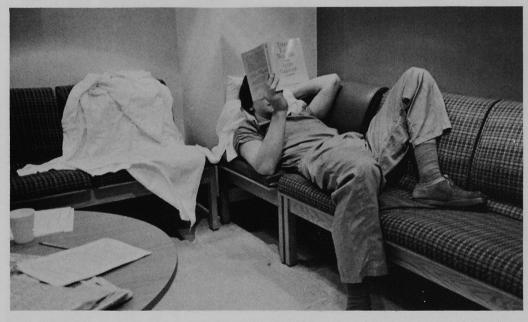

'n' then suddenly yer one of everybody
'n' yer inside now
'n' no matter what ya do,
yer always gonna be inside cuz nobuddy outside
knows what it's like ta be inside until they're inside

'n' ya remember the Christmas cards patients sent ya 'n' the times they'd say 'yer gonna be a good doc' 'n' goin' out with yer team after a night when yu'd all been workin' late 'n' walkin' down a hall in the Riley 'n' hearin' a kid say, 'Hey Deddy, that's my doctor' 'n' ya think a yer friends who stayed by ya all the way even if ya studied all the time 'n' couldn't party stayed by ya just cuz yer yu

'n' ya remember watchin' a guy die on the table
'n' seein' the surgeons walkin' down the hall ahead a ya
'n' seein' 'em real quick pat each other's backs for comfort
'n' then watchin' 'em turn around 'n' say
'glad we had yer help' to ya
'n' ya know yu'd never do this over
but ya know that whatever yu coulda done
yu know yu'd never missed this for anything
'n' yu know yu'll never have buddies just like this agin

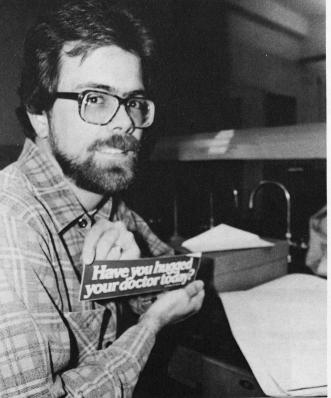

'n' so now yer on yer last nite a call here
'n' yer walkin' down ta Sunshine Hall
er yer watchin' the sunset from a west ward at the Spa
'n' yer graduatin' inta bein' a real doc
'n' ya look 'n' ya see
how this place has grown
'n' how yu've grown
'n' how yer friends've grown
'n' how the times, they've grown

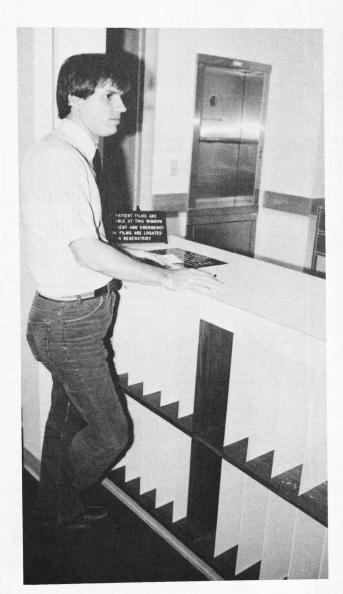

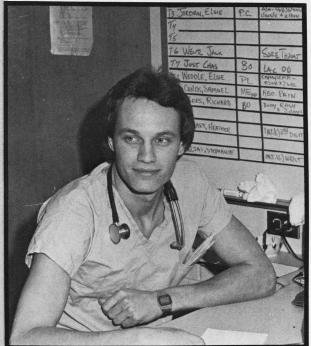

The (Official) M.D. Handbook

"Look, doctor, somebody finally wrote a book for us"

... The first guide to the Profession. Includes how to dress like a doctor, what to say, and rules to live by.

HIT LIST

- Good admissions can be hit at long range with an 18 gauge angiocath.
- Good admissions know their complete PMH in chronological order and can tell it in less than 5 minutes.
- Good admissions know the names and dosages of all their meds.
- Good admissions arrive at the hospital before changeover
- 5. There is no good admission after midnight.

THINGS DEGOWEN AND DEGOWEN NEV-ER TOLD YOU

- 1. O sign
- 2. Q sign
- tattoo sign (indication for a stat VDRL)
- suitcase sign (in an ER patient)
- 5. veteranoid
- 6. wishard unit
- tachylordy (lordylordylordy)
- bradylordy (ohhhlorrddyy)
- 9. gomertose
- 10. hygienic crisis

DRESSING THE PART

The Junior Student

- ... wears a short dirty white coat. The dirtier the coat, the lower on the hierarchy one is. Lots of betadine impresses mom when she does the laundry, but blood is definitely declasse.
- ... carries a stethoscope; penlight, pocket ruler, pens and notepads for lab values. All preferably with drug names on them; reflex hammer; safety pins for neuro exams; if on surgery 4 x 4's, tape in all sizes, and bandage scissors; at least 2-20 gauge angiocaths; 2 red-top and 2 purple-top tubes with vacutainer and needles; tourniquet tied through the buttonhole.
- ... wears greens whenever possible.
- ... doesn't shave after a night on call.
- ... carries a clipboard.
- ... has bags under the eyes.

The Senior Student

- ... wears the same white coat, only cleaner.
- ... carries only a blue notebook for pearls, pocket ruler, penlight, stethoscope, and EKG calipers. The coat weighs 7 kilos less than the Junior Student's.
- ... doesn's have bags under the eyes

The Intern

- ... wears a long white coat with the pockets ripped.
- ... carries a stethoscope, pocket ruler (penlight was lost last year), calipers, date book, official name tag, and a battered Washington manual.
- ... has bags under the eyes.
- \ldots sometimes doesn't shave even when he hasn't been on call.

The Resident

... dresses like an intern, but always shaves and doesn't always have bags under the eyes.

The Staff Man

- ... wears an immaculate white coat over either a threepiece suit or a turtleneck.
- ... carries the latest Green Journal from which to strafe the underlings.
- ... lost his stethoscope awhile back.

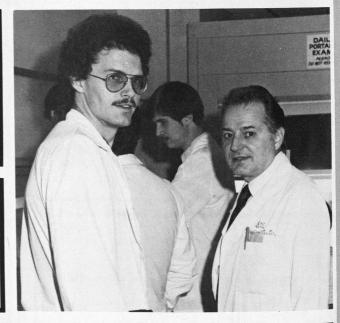

It's better to be a good liver than to have one.

APHORISMS

- 1. To be on time is to be early.
- 2. Bleeding always stops.
- 3. If it works, don't fix it.
- 4. Nothing is obvious to the uninformed.
- 5. A good student takes the blame.
- 6. See one, do one, teach one.
- 7. Never manipulate a tube if the sun is on its downward descent in the sky.
- 8. If all else fails, do a physical exam.
- 9. Do what's right.
- 10. Above all else, do no harm.

HOW TO TALK LIKE A REAL DOC

- 1. Don't hurt me now.
- 2. We got killed!
- 3. Everything we cut bled.
- 4. It was dry when we left.5. It was solid concrete.
- 6. We got it all.
- 7. All bets are off.
- 8. Hurry up and wait.

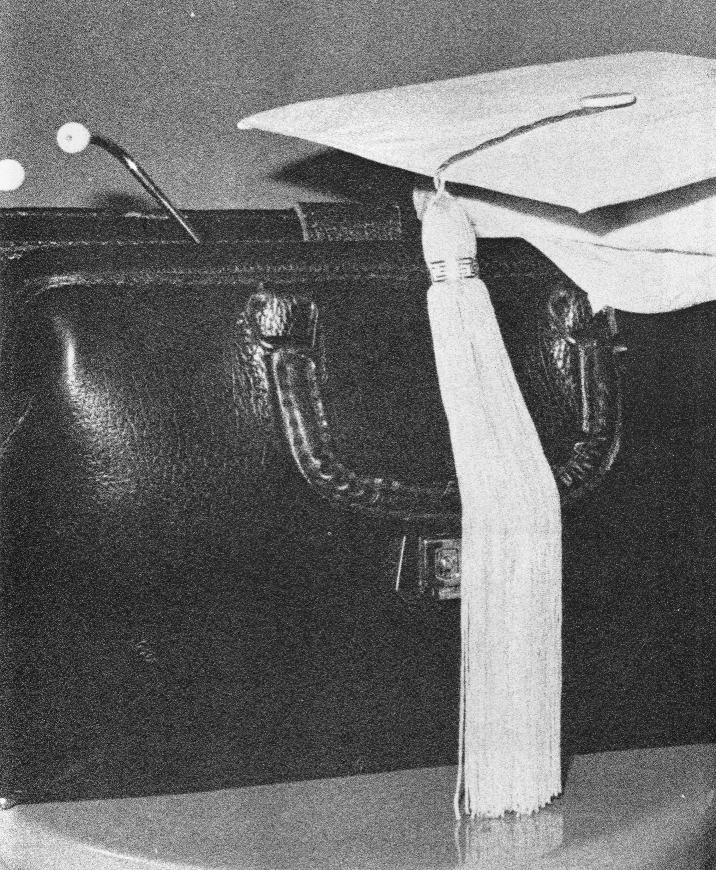

A picture is worth a thousand words.

FIVE DISEASES TO KNOW AND LOVE

- 1. sick-as-hell anemia
- 2. reverse tineacolor
- 3. screamin' mighty jesus
- 4. VD of the lungs ("claps" of the lungs)
- 5. abominable pain

Congratulations To The Class Of 1982

We Wish You Well And Hope You Choose Indiana As The Location For Your Practice

INDIANA UNIVERSITY SCHOOL OF MEDICINE ALUMNI ASSOCIATION

Imagine Medicine Without a Medical Society

There would be no one

- · to speak for you at the legislature
- to represent you before Congress
- · to stand up to HHS for you
- to work effectively with governmental programs
- to go to court for you
- · to stand firm against NHI
- to fight for you in an insurance crisis
- · to represent your views to the media
- · to help medically educate the public
- to up-date you on medical news/issues
- to assure quality medical education
- to answer your questions
- to help with problems of third party carriers

but you.

You and your county, state and national medical societies, together as a team, can do all of the above effectively and in your best interest. Their purpose is to work only for you, the physician, who doesn't usually have sufficient time or knowledge needed to preserve, protect and insure the progress of high-quality, independent practice of medicine in today's complicated and rapidly changing world.

Your medical society team can provide you with a liaison with government, medical-legal consultation, lobbying in your best interests, concerted political action, insurance programs, news media relations, public information/education programs, membership publications to keep you informed, continuing medical education, and many other benefits.

For a free brochure with membership information, call or write: INDIANA STATE MEDICAL ASSOCIATION 3935 N. Meridian • Indianapolis, IN 46208 (317) 925-7545 or toll-free Indiana WATS 1-800-382-1721

Congratulations Class of 1982

As our newest colleagues, we welcome you to the profession of medicine and congratulate you on your recent achievement.

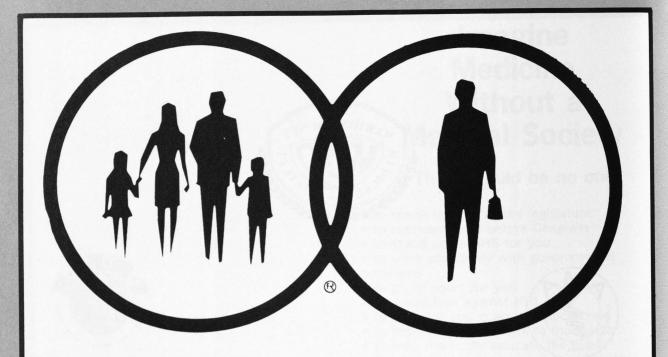

A distinguishing feature of a profession is the ability to work together for the common good of the profession and those they serve. We trust you will wish to be a part of this effort.

The Marion County Medical Society serves as your point of entry to the professional body of medicine. We extend this invitation to you to participate in our future. For membership information, call the Medical Society at 639-3406.

On behalf of your colleagues and teachers, here and nationally, we wish you continued success and offer to work with you in the future.

Donald J. Kerner, M.D. President

John C. Lowe, M.D. Chairman of the Board of Directors

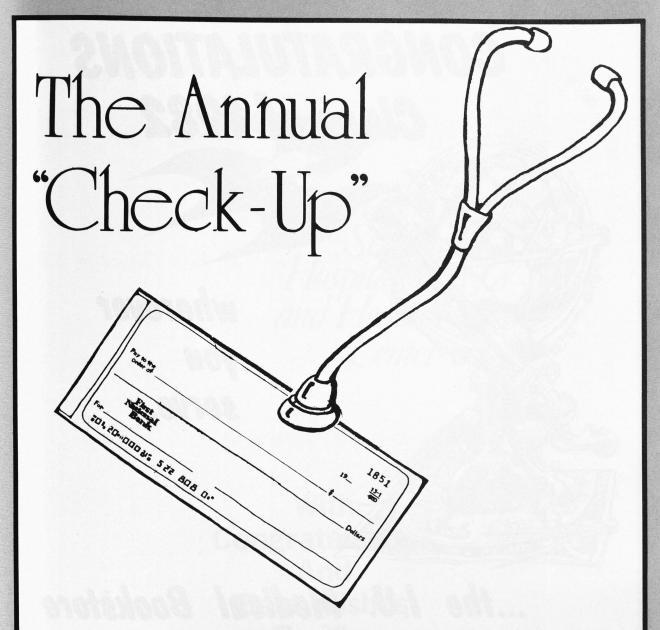

THE INDIANA ACADEMY OF FAMILY PHYSICIANS FAMILY PRACTICE CLUB

Congratulates All The 1982 Graduating Seniors

Best Wishes To Each Of You In All Your Future Endeavors

President Jerry L. Stucky, M.D. Ft. Wayne, Indiana

Like a typical health-conscious patient, the Indiana University School of Medicine asks us to conduct an annual check-up of its alumni body.

University Foundation to check with you!

Our check-list includes gift opportunities for

the School of Medicine: scholarships, professorships, loan and research funds - all necessary to the School's well-being.

Annually, our check-ups reveal a high degree So, as a new alum, you can expect the Indiana of loyalty to the IU School of Medicine. When you write a check in response to our appeals, you will be part of a proud tradition.

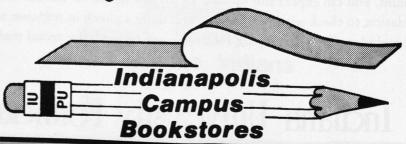

The Indiana University Foundation

ROSS LABORATORIES Research · Services **Quality Products**

in support of health care since 1925

Ross Laboratories, a long-time leader in providing quality products for the care of infants, children, and adults, takes pride in its continuing support of research and specialized services in pediatrics. obstetrics, and clinical nutrition.

Ross Conferences On Pediatric Research

For nearly 30 years, Ross Conferences have explored a wide range of subjects and have contributed significantly to practical knowledge and the stimulation of research. Conference reports are available on the following topics: Slow Virus Infections: Regionalization of Perinatal Care: The Care of Children with Chronic Illnesses: latrogenic Problems in Neonatal Intensive Care: Apnea of Prematurity: The Roles of Family Practice. Internal Medicine. Obstetrics and Gynecology and Pediatrics in Providing Primary Health Care: Etiology. Pathophysiology. and Treatment of Acute Gastroenteritis: and The Ductus Arteriosus.

Ross Serial Publications

Ross Timesaver Newsletters provide timely information to doctors. nurses, public health and hospital administrators, nutritionists, and dietitians. Pediatric Currents. Feelings, Pediatric World, Pediatric Nursing Currents, Hospital Administration Currents, Public Health Currents, Allergy Currents, OB World, WIC Currents, Dietetic Currents, and Long-Term Care Currents enjoy wide readership.

Nutrition in Disease is a series of monographs that discuss current nutritional considerations of various diseases and provide rationale for diet modification.

Perinatology, Neonatology, **Pediatric Nutrition Currents**

This semiannual journal presents. in abstract form, recent periodical publications in the subject areas named, with annotations by experts in these fields.

Ross Roundtables

These seminars, held in collaboration with the Ambulatory Pediatric Association, provide critical presentations and discussions of common pediatric problems. Published reports are available on the following topics: Common Orthopedic Conditions in Childhood. Adolescent Gynecology, Child Advocacy and Pediatrics, and School-Related Health Problems.

Developmental Nutrition

Developmental Nutrition discusses nutritional components individually or in appropriate groupings, tracing need, effect, and metabolism from gestation to maturity.

Children Are Different

Children Are Different: Developmental Physiology, second edition, is a revised and expanded compilation of material from a series of booklets originally mailed to physicians as a Ross service. Designed as a handy reference for professionals who provide medical care for children, the book emphasizes normal developmental morphology and physiology and the relation of certain diseases to physiologic phenomena at various developmental stages.

Ross Developmental Aids. Parent Counseling Booklets

These individual booklets assist the physician in counseling parents of young children on various subjects of concern. Topics include Special Hospital Care for Your New Baby. Your Premature Infant, You and Your Baby, Feeding Your Growing Baby, Breast-Feeding Your Baby, Your Child's Appetite, Developing Toilet Habits, How Your Child Learns About Sex. The Phenomena of Early Development. Becoming a Parent, Your Children and Discipline, Your Child's Fears, and Your Baby Becomes a Toddler.

Ross Planning Associates

Ross offers consulting and design assistance in perinatal, pediatric. and dietary facilities planning. On-site facilities review, conference participation, idea sketches, and written critiques are provided at no charge.

Quality Products

Ross Laboratories provides physicians with nutritional and pharmaceutical products of unexcelled quality and reliability for patient

For further information on any of these services and products, contact your local Ross Territory Manager.
